

# Press Release

## Bicycle, Pedestrian, and Transit Facilities Inventory

The Capital Area Metropolitan Planning Organization has contracted with Geotek Mapping to update the MPO's existing inventory. This effort will include inventory of facilities in Franklin, Granville, Harnett, Johnston and Wake counties. The update will include mapping, photographing and otherwise reporting on all bicycle, pedestrian and transit facilities within the MPO's planning boundaries.

The MPO's goal is to collect the bicycle, pedestrian, and transit stop inventory and maintain accurate location and attribute data of the bicycle and pedestrian facilities; as well as maintain an accurate inventory of transit stops and their associated features. This information will be used when evaluating and selecting future transportation and land use planning projects. Geotek Mapping staff and crews will be in your area soon. Please note that Geotek staff will have appropriate identification displaying both the MPO and Geotek logos.

2010 Bicycle, Pedestrian and Transit Facilities Update Project
